

PATERSON LECTURE

Jeffrey Ravetch, MD, PhD

Theresa and Eugene Lang Professor, Rockefeller University;
Director, Cooperative Center for Human Immunology;
Head, Leonard Wagner Laboratory of Molecular Genetics & Immunology

“Enhancing Immunity through Fc Receptors”

Thursday, November 14, 2019

9:00 - 10:30 a.m.

Auditorium A, University Hospital,
London Health Sciences Centre

Learning Objectives:

1. How is diversity generated for Fc mediated effector responses?
2. What roles do Fc receptors play in therapeutic antibody design?
3. How have clinical responses been modulated by Fc engineering of therapeutic antibodies?

Everyone is welcome
