

What is the role of imaging in a patient's prostate cancer journey?

Monday, December 12 from 4:30 to 6:00 p.m.

The prostate cancer session will be the second in a virtual public awareness series that outlines the role of imaging in a patient's cancer journey and highlights areas where research provides hope for earlier detection and improved treatment resulting in better outcomes.

The session will also highlight the important role patients can play in cancer research and care, providing a unique and vital perspective that can help improve outcomes for patients today and in the future.

Jerry Batista

OICR Imaging Program Patient Partner and Former Director of Physics Research and Education, London Regional Cancer Program Professor Emeritus, Western University

Terry Peters

OICR Imaging Program Patient Partner and Scientist
Robarts Research Institute, Western University

Masoom Haider

Radiologist and Clinician Scientist
University of Toronto

Glenn Bauman

Radiation Oncologist
London Health Sciences Centre
